

SJY Sports Asia × MAIA Proposal

Prepared for: SJY Sports Asia

Prepared by: Mindhive Asia

Date: 3 June 2026

1. Executive Summary

SJY Sports Asia distributes Franklin pickleball products, including paddles, equipment, accessories and apparel, to B2B customers such as pickleball courts and retail stores.

The company currently processes approximately 200 B2B orders per month. Orders are primarily received through WhatsApp, invoices are generated through SQL Accounting, and SiteGiant is used as the master inventory system for the wider business environment.

Today, the B2B order and document process still relies heavily on manual handling. In particular, one staff member currently handles document generation for the B2B workflow. As the business continues to manage more products, more customer requests and different fulfilment methods, this creates dependency on individual staff availability, repeated manual work and higher risk of operational delay or document error.

MAIA Lite is proposed as an internal B2B order processing and control layer that sits on top of SJY Sports Asia's current operating environment. Through WhatsApp and a structured backend workspace, MAIA will help the team process confirmed B2B orders, prepare invoices and Delivery Orders, maintain clearer document trails and improve management visibility over order progress.

MAIA is not positioned as a replacement for SQL Accounting or SiteGiant. SiteGiant will remain SJY Sports Asia's master inventory system. For the Phase 1 B2B workflow, SJY Sports Asia will update the relevant inventory information in SQL Accounting, and MAIA will refer to the latest available inventory information from SQL Accounting during order processing.

This proposal recommends a Phase 1 rollout focused on SJY Sports Asia's B2B order-to-document workflow. The objective is to deliver practical operational improvement quickly, while keeping the scope focused on the agreed B2B order-to-document workflow.

With the recommended rollout, SJY Sports Asia should expect:

- Less manual processing of confirmed WhatsApp orders
- Faster preparation of invoices and Delivery Orders
- Reduced dependency on one document-processing staff member

- Clearer visibility of order details, documents and status
- Better accountability through activity and document trails
- A stronger operating foundation for future B2B growth

2. Our Understanding of the Current Business Issues

2.1 Manual Processing of Confirmed WhatsApp Orders

SJY Sports Asia receives its B2B orders primarily through WhatsApp. Most orders are already confirmed by the customer, which means the team usually proceeds directly to invoice preparation.

Today, staff still need to interpret the order request, identify the customer and products, then manually prepare the relevant documents through SQL Accounting.

This creates repeated key-in work and increases dependency on staff accuracy, especially when handling multiple SKUs, delivery requirements and customer information.

2.2 Dependency on Limited Administrative Resources

Approximately 200 B2B orders are processed each month, while only one staff member currently handles document generation.

This creates an operational bottleneck. If the responsible staff member is unavailable, overloaded or required to manage several urgent orders at once, the processing of invoices and Delivery Orders may be delayed.

As volume increases, this dependency becomes harder to manage without increasing administrative workload.

2.3 Delivery Order and Fulfilment Coordination

SJY Sports Asia requires Delivery Orders as part of its fulfilment process. Once orders are confirmed and documents are prepared, the warehouse team performs the required picking and packing activity before delivery is arranged.

Delivery methods may include Lalamove, local freight, interstate freight to Sabah and Sarawak, or international freight depending on the order and customer requirements.

Where this process is handled through separate communications and manual document preparation, it becomes more difficult to maintain a clear view of which orders are ready, pending fulfilment or already delivered.

2.4 Inventory Reference Through SQL Accounting

SJY Sports Asia also operates B2C sales channels, including Shopee, Lazada and TikTok. Because stock is shared across channels, SiteGiant remains the master inventory system for the wider business.

For the Phase 1 B2B workflow, MAIA will not integrate directly with SiteGiant. SJY Sports Asia will update the relevant inventory information in SQL Accounting, and MAIA will refer to the latest available inventory information from SQL Accounting during B2B order processing.

The accuracy of the inventory information shown or referenced in MAIA will therefore depend on SJY Sports Asia keeping the relevant inventory information in SQL Accounting accurate and up to date.

2.5 Why This Matters Commercially

The issues above do not only create administrative inconvenience. They can also affect SJY Sports Asia commercially through:

- Slower processing of confirmed customer orders
- Increased dependency on limited administrative manpower
- Higher risk of incorrect item, quantity or document handling
- Delays in warehouse and delivery coordination
- Limited management visibility over pending and completed orders
- Difficulty scaling B2B order volume without increasing operating cost in the same proportion

3. Proposed Solution Overview

3.1 What MAIA Is in This Proposal

In this rollout, MAIA Lite will act as an internal WhatsApp-based B2B order processing and control layer for SJY Sports Asia.

It is designed to help the internal team process confirmed B2B customer orders more consistently, prepare the agreed documents, maintain order visibility and improve operational coordination through a structured backend workspace.

3.2 How MAIA Will Fit into SJY Sports Asia's Environment

MAIA will work together with:

- WhatsApp as the current B2B order intake channel
- SQL Accounting as the client's existing accounting and document environment
- SiteGiant as the client's existing master inventory environment

- SJY Sports Asia's agreed internal fulfilment and delivery process

Rather than replacing existing systems, MAIA will improve the operating layer around the current B2B workflow.

This includes helping staff:

- Capture order requests from WhatsApp more cleanly
- Identify the relevant customer and item details
- Prepare invoice and Delivery Order drafts for review
- Maintain linked documents under the same order trail
- Track the status of each B2B order
- Reference the latest available inventory information from SQL Accounting during B2B order processing
- Provide management with clearer visibility over order progress

3.3 What Changes After Implementation

After Phase 1 implementation:

- Confirmed B2B orders received through WhatsApp can be forwarded into MAIA
- MAIA can prepare the relevant customer, product and order information for staff review
- Staff can review and confirm draft documents before final use
- Invoice and Delivery Order preparation becomes more structured
- Documents and activities are tied back to the relevant B2B order record
- Management can view order progress through the backend workspace
- MAIA can refer to the latest available inventory information from SQL Accounting during B2B order processing

4. Phase 1 Scope Included in This Proposal

4.1 Phase 1 Objective

Phase 1 is designed to improve SJY Sports Asia's core B2B order-to-document workflow first.

The objective is to reduce manual invoice and Delivery Order preparation, improve operational visibility and reduce dependency on a single staff member, while avoiding unnecessary expansion into B2C channels or unconfirmed integration requirements.

4.2 Included Workflows

The recommended Phase 1 rollout includes the following workflows:

- Internal WhatsApp-based B2B order intake
- Confirmed customer order capture and review
- Customer and item reference during document preparation
- Invoice draft preparation for confirmed B2B orders
- Delivery Order preparation for fulfilment handoff
- Inventory reference from SQL Accounting during B2B order processing
- Stock availability checking based on the latest available inventory information maintained in SQL Accounting
- Order document trail and activity history
- Backend visibility of agreed B2B order progress

4.3 Included Capabilities

Phase 1 includes:

- Internal-facing WhatsApp workflow for authorised staff
- Order request forwarding into MAIA
- Extraction and preparation of customer, item and quantity details
- User review and confirmation before final document handling
- Item and customer reference support
- Customer-specific pricing reference where pricing data is provided and configured
- Invoice draft preparation
- Delivery Order preparation
- Basic stock availability reference based on the latest available inventory information from SQL Accounting
- SQL Accounting inventory reference setup for the agreed Phase 1 workflow, subject to technical confirmation
- Document trail for agreed B2B order documents
- Activity trail for relevant order changes
- Order status tracking
- Backend visibility for authorised management and operational users
- Role-based access for agreed internal users

- SQL Accounting integration setup for agreed Phase 1 document flow, subject to technical confirmation

4.4 Documents Included

The following document support is included in the agreed Phase 1 scope:

- Sales Invoice
- Delivery Order

Where SJY Sports Asia later requires other document types, such as quotations, credit notes, debit notes, receipt vouchers or return documents, these may be assessed for inclusion based on the confirmed operating requirement.

4.5 What Goes Live at the End of Phase 1

At the end of Phase 1, SJY Sports Asia will have a working internal B2B workflow where authorised staff can:

- Forward confirmed customer orders received through WhatsApp into MAIA
- Review prepared customer, product and order information
- Prepare the agreed invoice and Delivery Order documents
- Reference the latest available inventory information from SQL Accounting during B2B order processing
- Track relevant order documents and activities in one workspace
- View the status of agreed B2B operational flows through the backend system

5. Key Workflow Scenarios

5.1 Scenario A: Confirmed B2B Order Received Through WhatsApp

1. A B2B customer sends a confirmed order through WhatsApp.
2. SJY Sports Asia staff forwards the order information into MAIA.
3. MAIA identifies the customer, requested items and quantities based on the configured reference data.
4. Staff reviews the prepared order information and confirms any required corrections.
5. MAIA prepares the invoice draft for the confirmed order.
6. Once reviewed, the relevant document can proceed through the agreed operational flow.
7. The order and document activity are recorded in the backend workspace for visibility.

5.2 Scenario B: Invoice and Delivery Order Preparation

1. A confirmed B2B order has been reviewed by the responsible staff member.
2. MAIA prepares the agreed invoice information based on the confirmed order.
3. MAIA prepares the Delivery Order required for warehouse and fulfilment handoff.
4. The warehouse team receives the relevant information to prepare the items.
5. Delivery is arranged through the appropriate fulfilment method determined by SJY Sports Asia.
6. Related documents remain traceable under the same order record.

5.3 Scenario C: Inventory Reference Through SQL Accounting

1. SJY Sports Asia updates the relevant inventory information in SQL Accounting based on its existing internal process.
2. MAIA refers to the latest available inventory information from SQL Accounting during B2B order processing.
3. When staff process an order through MAIA, MAIA can reference the available stock information maintained in SQL Accounting.
4. If the available inventory information suggests insufficient stock, staff can review the order before proceeding.
5. SiteGiant remains SJY Sports Asia's master inventory system and is not directly integrated with MAIA under Phase 1.

6. Implementation Approach

6.1 Implementation Stages

Implementation is expected to proceed in the following order:

1. Kickoff and B2B workflow confirmation
2. Confirmation of document flow and user responsibilities
3. Customer, item, pricing and SQL Accounting inventory reference setup
4. MAIA system configuration
5. SQL Accounting integration confirmation and setup for agreed scope
6. User acceptance testing
7. User training
8. Go-live support

6.2 What Mindhive Will Do

Mindhive will:

- Confirm the agreed B2B order and document workflow
- Configure the internal WhatsApp-based MAIA workflow
- Set up relevant customer, item, pricing and SQL Accounting inventory references based on the agreed Phase 1 workflow
- Configure invoice and Delivery Order handling for the agreed scope
- Implement the agreed SQL Accounting integration approach, subject to technical confirmation
- Provide backend workflow visibility for authorised users
- Support user acceptance testing and issue clarification
- Conduct training for agreed users
- Support rollout for the agreed Phase 1 scope

6.3 What SJY Sports Asia Will Need to Provide

SJY Sports Asia will need to provide:

- Relevant SQL Accounting system information, access requirements or vendor coordination
- Confirmation of the intended SQL document flow
- Customer master data required for Phase 1
- Item and product master data
- Relevant pricing reference information
- Confirmation of how inventory information is maintained and updated in SQL Accounting
- Sample invoice and Delivery Order templates
- Clarification of internal review and approval responsibilities
- Internal PICs for review, testing and sign-off
- UAT users and timely feedback during testing

6.4 User Acceptance Testing and Acceptance

Before go-live, SJY Sports Asia will test the agreed Phase 1 workflows during User Acceptance Testing.

Mindhive will address issues within the agreed Phase 1 scope that prevent the approved test cases from functioning as intended before the implementation is considered successfully delivered and accepted.

Any new requirements, additional workflows, changes in scope or client-specific requests identified during testing will be assessed separately and may require additional commercial agreement.

7. Timeline

7.1 Indicative Timeline

Phase	Scope	Estimated Timeline
Phase 1	Internal B2B WhatsApp order processing, invoice and Delivery Order workflow, backend visibility, agreed SQL Accounting setup, training and go-live support	Approximately 3 to 4 weeks

7.2 Timeline Notes

The indicative implementation timeline will begin after Mindhive has received the required system access, confirmed workflow information, sample documents, master data and any required coordination from SJY Sports Asia and its relevant system vendors.

The Phase 1 timeline may vary depending on:

- Access to SQL Accounting or required vendor coordination
- Turnaround time for customer, item, pricing and inventory data
- Availability of sample documents
- Speed of SJY Sports Asia's internal review and testing feedback
- Confirmation of the agreed SQL Accounting inventory reference workflow

8. Commercial

8.1 MAIA Lite One-Time Implementation Fee

Category	Scope	What It Covers	One-Time Fee
MAIA Lite Phase 1	Internal WhatsApp B2B Order Assistant	Turns confirmed WhatsApp B2B orders into structured, reviewable order information for invoice and Delivery Order preparation	RM20,000 FOC

	Invoice preparation workflow	Supports draft invoice preparation for confirmed B2B orders based on agreed customer, item and pricing references	
	Delivery Order preparation workflow	Supports Delivery Order preparation for warehouse and fulfilment handoff	
	Customer, item and pricing references	Uses agreed operational references to support more consistent document preparation	
	SQL Accounting inventory reference	Allows MAIA to refer to the latest available inventory information maintained in SQL Accounting during B2B order processing	
	Document and activity trail	Maintains clearer traceability of agreed B2B documents and operational actions	
	Management order overview	Provides backend visibility of agreed B2B order progress and status	
	Role-based access	Supports agreed internal user access for operations and management visibility	
	SQL Accounting integration setup	Supports agreed Phase 1 document-related integration approach, subject to technical confirmation	
	Total MAIA Lite Phase 1 Implementation Fee		FOC

Phase 1 Implementation Fee Note

The MAIA Lite Phase 1 implementation fee of RM20,000 is waived for SJY Sports Asia under this commercial arrangement.

Direct SiteGiant integration and B2C marketplace integration are not included in this proposal.

8.2 MAIA Lite Monthly Subscription

SJY Sports Asia is proposed under the MAIA Lite package.

Package	Orders Per Month Cap	
MAIA Lite	Up to 600 successful orders per month	RM1,000 per

Monthly Subscription Note

SJY Sports Asia currently processes approximately 200 B2B orders per month. The MAIA Lite package provides capacity for up to 600 successful orders per month, which gives SJY Sports Asia sufficient room for its current B2B order volume and near-term growth.

8.3 Minimum Commitment and Upfront Payable

The MAIA Lite package is subject to a minimum 3-month commitment.

Item	Amount
MAIA Lite subscription, 3 months upfront	RM3,000
Total Upfront Payable	RM3,000

8.4 Third-Party Fee Breakdown

The following third-party fees are separate from MAIA's implementation fee and monthly subscription.

Third-Party Item	Cost	Notes
Server and hosting	RM500 - RM700 per month	Estimated hosting cost for the agreed MAIA environment.
WhatsApp Business	RM30 per month	Estimated WhatsApp Business related cost.
ChatGPT API key usage	RM200 per month	Estimated AI API usage cost.
Total Third-Party Monthly Cost	RM700 - RM930 per month	Separate from MAIA's RM1,000 monthly subscription.

Third-Party Payment Arrangement

All third-party fees listed above will be paid directly by SJY Sports Asia to the respective third-party service providers.

Mindhive will not collect or invoice SJY Sports Asia for these third-party fees unless otherwise agreed in writing.

The final charges may vary depending on the service provider's pricing, actual usage, hosting requirements and message volume.

Third-Party Fee Note

Third-party fees are charged separately because they are paid to external providers and may vary depending on actual usage, vendor pricing, hosting setup and message volume.

Mindhive will help advise SJY Sports Asia on the expected setup, but these third-party costs are not included in the MAIA Lite monthly subscription unless stated otherwise.

8.5 What the Monthly Subscription Covers

The monthly subscription covers:

- MAIA platform access for the agreed Phase 1 setup
- Ongoing usage of the agreed internal WhatsApp-based B2B workflow
- Standard support for the agreed scope
- Bug fixes within the agreed scope
- Standard operational maintenance for the subscribed setup
- Usage coverage for up to 600 successful orders per month under MAIA Lite

8.6 Payment Terms

Milestone	Amount	Payment Trigger
Total upfront payable	RM3,000	Upon project commencement
Subsequent MAIA Lite subscription	RM1,000 per month	Following the initial three-month commitment, the subscription will continue at RM1,000 per month and will be billed quarterly in advance at RM3,000 per quarter.

Following the initial three-month commitment, the MAIA Lite subscription will continue on a quarterly billing cycle at RM3,000 per quarter unless terminated by either party with 30 days’ written notice before the next billing cycle.

8.7 Third-Party Payment Arrangement

Estimated third-party fees of RM930 per month will be paid directly by SJY Sports Asia to the respective service providers. Mindhive will not invoice or collect these amounts unless otherwise agreed in writing.

8.8 Commercial Notes

- The MAIA Lite Phase 1 implementation fee of RM20,000 is waived under this proposal.
- No client-specific customizations are included in this Phase 1 proposal.

- The MAIA Lite subscription is RM1,000 per month for up to 600 successful orders per month.
- The MAIA Lite package is subject to a minimum 3-month commitment, payable upfront at RM3,000.
- Total upfront payable upon project commencement is RM3,000, consisting of RM3,000 for the 3-month MAIA Lite subscription
- Third-party monthly fees are estimated at RM930 per month and will be paid directly by SJY Sports Asia to the respective third-party service providers.
- Third-party fees are separate from MAIA's implementation fee and monthly subscription.
- Any usage above 600 successful orders per month may require a revised commercial arrangement.
- Direct SiteGiant integration and B2C marketplace integration are not included in this proposal.
- Final third-party fees will depend on actual provider pricing, usage and technical requirements. These fees will be paid directly by SJY Sports Asia to the relevant providers.
- This proposal is valid for 7 days from the date of issuance.

9. Assumptions and Exclusions

9.1 Assumptions

This proposal assumes that:

- MAIA will support SJY Sports Asia's B2B operational workflow and will not replace SQL Accounting or SiteGiant.
- MAIA will not integrate directly with SiteGiant in Phase 1.
- SiteGiant will remain SJY Sports Asia's master inventory system.
- SJY Sports Asia is responsible for maintaining and updating the relevant inventory information in SQL Accounting.
- MAIA will refer to the latest available inventory information from SQL Accounting during B2B order processing.
- The accuracy of stock information shown or referenced in MAIA depends on the accuracy and timeliness of the inventory information maintained in SQL Accounting.
- Phase 1 focuses on the internal B2B order-to-document flow only.
- B2C marketplace sales channels, including Shopee, Lazada and TikTok, remain outside the initial scope.

- SJY Sports Asia will provide the required customer, item, pricing and document reference information for setup.
- Invoice and Delivery Order formats can be confirmed during implementation.
- SQL Accounting integration is subject to technical validation of the client's environment and required connection method.
- Any ambiguous, incomplete or exception-based order scenario may still require human review and confirmation.
- Implementation progress depends partly on timely client-side feedback and vendor responsiveness where relevant.

9.2 Exclusions

Unless otherwise stated, this proposal does not include:

- Full ERP or accounting-system replacement
- Replacement of SiteGiant as the client's master inventory system
- Direct SiteGiant API integration
- Live inventory sync from SiteGiant to MAIA
- B2C marketplace integration for Shopee, Lazada or TikTok
- POS integration
- Courier, Lalamove, freight or logistics-provider system integration
- Advanced sales analytics, churn prediction or upsell recommendation models
- Custom management dashboards beyond agreed standard operational visibility
- Custom workflows outside the agreed Phase 1 B2B scope
- Additional documents not confirmed under Phase 1
- Third-party implementation work outside Mindhive's agreed scope
- Third-party charges, vendor fees or API usage costs unless specifically listed under the third-party fee breakdown

10. Success Criteria for Phase 1

Phase 1 will be considered successfully delivered when:

- The agreed internal WhatsApp-based B2B workflow is configured and available for use
- Agreed customer, item, pricing and inventory references required for the workflow are configured

- Authorised staff can process confirmed B2B order information through MAIA
- Invoice and Delivery Order workflows function according to the agreed test cases
- MAIA can refer to the latest available inventory information from SQL Accounting according to the agreed Phase 1 workflow
- Agreed backend visibility, document trail and activity trail features are available
- Agreed SQL Accounting document-related integration setup is completed, subject to confirmed technical feasibility
- Relevant internal users are trained
- Agreed UAT scenarios are completed and accepted by SJY Sports Asia
- The client signs off on the agreed Phase 1 rollout scope
- All agreed UAT test cases have passed, and any issues preventing the agreed workflows from functioning have been resolved.

11. Recommended Next Steps

To proceed, we recommend the following next steps:

1. Confirm acceptance of the proposed MAIA Lite Phase 1 B2B scope.
2. Confirm commercial acceptance of the waived implementation fee, MAIA Lite monthly subscription and third-party fee breakdown.
3. Appoint implementation PICs from SJY Sports Asia and Mindhive.
4. Provide sample invoice and Delivery Order documents.
5. Provide the relevant customer, item, pricing and inventory reference data.
6. Confirm how inventory information will be maintained and updated in SQL Accounting for MAIA's reference.
7. Schedule the kickoff workshop.
8. Begin workflow confirmation, technical setup and user acceptance planning.

12. Appendix

12.1 Proposed Before and After Workflow

Current Workflow	Proposed MAIA-Assisted Workflow
Customer sends confirmed B2B order through WhatsApp	Customer continues sending confirmed B2B order through WhatsApp

Staff manually interprets the order details	Staff forwards the request into MAIA for structured preparation
Staff manually identifies customer, product and quantity information	MAIA references configured customer and item information for review
Staff manually prepares invoice through SQL Accounting	MAIA supports invoice draft preparation for confirmation
Delivery Order is prepared separately for fulfilment	MAIA supports Delivery Order preparation linked to the same order trail
Documents and activities require manual tracing	Documents and relevant activities are tracked within the backend workspace
SiteGiant remains the master inventory system and relevant inventory information is updated in SQL Accounting	SJY Sports Asia continues maintaining the relevant inventory information in SQL Accounting
Staff manually check available inventory during order processing	MAIA refers to the latest available inventory information from SQL Accounting during B2B order processing

12.2 Important Setup Items

The following items should be prepared during implementation:

Item	Purpose
SQL Accounting environment and connection method	Confirm agreed document integration setup
Invoice and Delivery Order format	Confirm required document outputs
Customer master data	Configure accurate customer reference information
Item master data	Configure accurate product and SKU reference information
Pricing reference structure	Confirm whether customer-specific prices are required
SQL Accounting inventory reference workflow	Confirm how MAIA will refer to the latest available inventory information maintained in SQL Accounting
Internal user list and roles	Configure role-based access and backend visibility

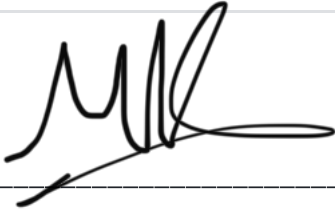

13. Acknowledgement & Agreement

This document serves as the agreed scope, commercials, responsibilities, and exclusions for MAIA’ s implementation for SJY Sports Sdn. Bhd.. By signing below, both parties agree to the items set out herein.
